All That Matter, and so many ways to use it! In this exhibition, we are looking at how matter can be used in mosaic to represent "all that matters" to the 23 featured artists: whether figurative or abstract, conceptual or concrete, as big as the Universe or as small as a bee, our aim is to express the theme in as vast an array as possible of the various methods and skills which can be found in the world of modern mosaic.

As 2019 marks the 20th anniversary of BAMM, we thought we would celebrate it by focusing on its main purpose: to encourage an interest in all aspects of modern mosaic. This is why this exhibition showcases artwork by both professional and amateurs. We believe that there is no better way to open the world of mosaic to the public than to show them how varied this art can be, and how it can entice people at all levels.

Whether by nippers or hammer and hardie, with precious smalti or found objects, by neat andamento or crazy paving, mosaic offers infinite possibilities of expression. Although it is one of the most ancient forms of art, it is yet to acquire its rightful place within the realm of fine arts. We are resolute in making this happen.
